

ZoneAlarm Extreme Security

ZoneAlarm Extreme Security is the most comprehensive multilayered security suite on the market that stops the toughest viruses, spyware and hackers. It's the ultimate solution for internet security and firewall protection, securing a 100% virus-free PC.

Antivirus and Anti-Spyware

Up-to-date antivirus detects and removes viruses, spyware, Trojan horses, worms, bots and rootkits.

Identity Protection

Alerts you if there are unauthorized changes in your credit files.

Advanced Firewall

Monitors programs for suspicious behavior, spotting and stopping new attacks that bypass traditional antivirus protection.

Two-Way Firewall

Makes your PC invisible to hackers, and stops spyware from sending your data out to the internet.

Anti-Phishing

Real-time protection from new and unknown phishing sites using static, heuristic and machine learning techniques.

Real-Time Cloud Security

Checks files against an always up-to-date cloud database of antivirus signatures.

Technical Support

Free customer support, including in-depth information, forums and 24/7 Live Chat.

Threat Emulation

Protects against zero-day attacks and undiscovered threats hidden in email attachments and Web downloads.

Anti-Keylogger

Prevents identity thieves from seeing your passwords and other keystrokes.

System Requirements

Microsoft® Windows® Vista SP2, 7 SP1, 8, 8.1, 10 (All versions)

32 or 64-bit, 4 GB RAM

2 GHz or faster processor

1.5GB of available hard-disk space

Microsoft® Windows XP SP3 Home / Professional

32-bit, 1GB RAM

1 GHz or faster processor

1.5GB of available hard-disk space

Microsoft .NET framework

Version 3.5 or later

Note: If a supported Microsoft .NET Framework is not installed, it will be installed with ZoneAlarm 2019

Compatibility

ZoneAlarm 2019 is only compatible with MS Windows Defender, and is not compatible with any other antimalware software.

ANTIVIRUS & FIREWALL

Antivirus & Anti-Spyware Engine

Detects and removes viruses, spyware, Trojan horses, worms, bots and more. Independently tested to provide superior protection.

- Kernel-Level Virus Prevention protects the operating system.
- Scan Modes let you customize your protection.
- Fastest-Updating Signature List detects and stops the most recent viruses that others miss.

Advanced Real-Time Antivirus

Provides access to the up-to-date database of Antivirus signatures to protect against newly emerging threats. Real-Time Cloud Database contains up-to-date reputation of files, web resources and software enhancing traditional Antivirus + Firewall protection.

- Checks files against Real-time Cloud database to ensure that even the latest threats are not missed.
- Contains the latest Antivirus signatures, web resources and software to ensure up-to-date protection.

Two-way Firewall

Stops Internet attacks at the front door and even catches thieves on their way out. Our two-way firewall proactively protects against inbound and outbound attacks while making you invisible to hackers.

- Threat Traffic is monitored and blocked – inbound and outbound.
- Full Stealth Mode makes you invisible to hackers.
- Kill Controls instantly disable malicious programs.

Advanced Firewall

No product is 100% effective against viruses or spyware. ZoneAlarm's advanced firewall monitors behaviors within your computer to spot and stop even the most sophisticated new attacks that bypass traditional antivirus and security suites.

- OSFirewall™ Monitors programs for suspicious behavior – spotting and stopping new attacks that bypass traditional anti-virus protection.
- Advanced-access Protection targets and defeats new, advanced attacks that other firewalls miss, such as raw data access, timing, and SCM and COM attacks.
- Zero-hour Protection prevents silent outbreaks from gaining system access – before other security programs can even detect the threat.
- Application Control uniquely shields your operating system during start-up, before most security products have even loaded.
- Early Boot Protection uniquely shields your operating system during start-up, before most security products have even loaded.

Threat Emulation

For any file you select, Threat Emulation protects against undiscovered threats by examining suspicious files in the cloud using four steps:

- Inspect – Email attachments and web downloads in MS Office, Adobe PDF and Zip formats are analyzed to see if they are safe or malicious based on known threats.
- Emulate – Suspicious files are uploaded to the cloud and opened in a virtual sandbox to check for abnormal behavior typical of malware.
- Prevent – If a file is determined to be malicious, you are alerted to delete it before it can infect your PC.
- Share – The Threat Emulation cloud database is updated with the new signatures preventing others from being infected.

PC Tune-Up

Keeps your PC running smoothly – automatically cleaning, organizing and streamlining your computer so it runs faster.

- Registry Repair and Defragmentation optimizes your registry by removing unused and redundant entries that make your computer operate more slowly.
- Disc Defragmentation optimizes the time it takes to retrieve and create files – making everyday computer operation faster, and in some cases freeing disk space.
- Temporary File Cleaner cleans out temporary and redundant files on your computer to free up disk space and reduce clutter.
- Low Resource Use is a system-maintenance program that is so light on resources, you'll hardly know it's running.

Additional Layers

Multiple layers of advanced protection provide unsurpassed security.

- Wireless PC Protection shields you from hackers, identity thieves and other online threats when you connect to an unsecured network.
- Automatic Wireless Network Security detects wireless networks and automatically applies the most secure firewall protection setting.
- DefenseNet™ provides real-time security updates, responds quickly to breaking threats and leverages threat data from millions of users – protecting your PC from the latest attacks.

WEB SECURITY

Browser Protection

Enhanced Browser Protection scans websites for dangerous scripts, files, archives and packed executables before they are downloaded onto the end-users' computer, preventing scripts/files from ever saving to disk or executing if they are found to be dangerous.

Anti-Keylogger

Prevents identity thieves from seeing your passwords and other keystrokes.

Parental Controls

Protect your children on the Web with powerful filters and controls. Your children can still do the things they need to do, but now they won't see things they don't need to see.

- Block dangerous content and programs: Stop pornography, profanity, hate sites, questionable chat rooms and online gambling. Create your own custom "block" list and more.
- Control Net usage: Limit the hours and define the time periods when your kids can use the Web.
- Protect your kids beyond the Web: Block PC games that are rated too mature or too violent. Get protection for instant messages (IMs), chat rooms, email, FTP, forums and more.

ONLINE PRIVACY

Private Browsing

Erases your cache and all, cookies, history and passwords – letting you browse the Web in complete privacy.

MOBILITY & DATA

Find My Laptop

Locates your lost or stolen laptop using Wi-Fi enabled location tracking which uses Google Maps and ZoneAlarm technology.

- Laptop Locate – Finds and displays the location of your missing laptop on a worldwide map including the address.
- Remote Lock – Remotely locks your laptop to prevent intruders from accessing your data.
- Message to Finder – Sends a custom message to the finder for a quick return of your missing laptop.
- File Recovery – Remotely retrieves and backup important files from your missing laptop. Deletes sensitive information remotely.
- Webcam Snapshot – Takes a snap picture of any person using your laptop.

Identity Protection Services

Identity theft can happen to anyone, anywhere. ZoneAlarm delivers superior PC-based protection and exclusive data encryption, and also offers offline identity-protection services.

- Daily Credit Monitoring and Fraud Alerts include daily credit reports with email alerts. You'll be notified of any changes in your credit reports – which are often an indication of identity theft (US only).
- Victim Recovery Service provides free telephone counseling to guide identity-theft victims through resolution and recovery (US only).

Online Backup

Your tax returns, your music and your photos are valuable. Protect your files in the event of loss, theft, accidental deletion or disk failure.

- Automated Backups schedule the backup of data at your convenience. Includes optional automatic shutdown of your computer when backup is complete.
- Efficient Backups effectively utilize your Internet bandwidth as the data files are compressed during transmission. Furthermore, only the modified portions of your files are backed up – speeding up the process.
- User-defined Encryption Keys secure your files as they are uploaded and downloaded. All stored data is encrypted with a secure key and a password known only to you – protecting your data from hackers.

SUPPORT

- Free upgrades for 12 months. You'll be notified automatically when a free new version is available.
- Free customer support includes in-depth information, forums and online LiveChat 24/7.
- 30-day guarantee: Satisfaction guaranteed or you'll get your money back.
